

8:30 am PST

Agenda:

1. Discord Bot
2. Wiki
3. Language for the International Women's Day Challenge event

Event Task Force lettuce meet sign-up has been created and shared in announcements

Will share 1-on-1 today as well

- different than the Selection Committee - short time commitment - the natural way that will shake off - you can be in 2 committees consecutively, but then you have to sit out for 3 Selection Committee

Identify the MC's

- Layla will volunteer to do it
- Christina will volunteer to do it

---

ME6 Bot she researched this morning

There is an announcements page and that's the only thing they can see until they click that.

They react to a thing. Then you get assigned the global role that they already have. The role blocks people from seeing everything and you can see very little

David - global role or a specific role within the bot, Clarkio might be able, etc. - David will ask all three in a Discord chat to see if they can help us set up the bot

---

GitHub Repo Wiki Creation

Enter the repository home

Create a new repository - public for now - not put code in it - click new

Wiki is a GitHub specific feature of a repo

Can add things later and change later

Create button

Add new people to the repo

Settings>options scroll down Wikis

upload as a part of the repository and teach me Git -

You can add new stuff, or you can add new pages

You can clone the file

You can pull the code down and do local editing, then push it up

Video of the meeting has been uploaded to The Live Coders YouTube Meeting channel
